

# SLIPFORM PAVING

Edge Detail

1900' x 10'  
Pervious Paving  
Palo Alto, CA

Installers touchup the edges.

TrailRider® needs only 8" side clearance so paving near obstructions like the ravine above is easy. Pervious mixes are extruded so well finishing is typically not required.

## Features:

- Forms, places, compacts & finishes *In One Pass!*
- Eliminated 3800 feet of forming on this job.
- All you do is touch up the edge, cut joints & cure.
- Six day job done in 2.5 by first time TrailRider® user!
- Works with *Pervious* or *Standard Concrete*.
- Easy to operate (on-site training included in quote).
- Perfect for golf courses, bike trails, long driveways.

Adjustable width and depths.

Call for more details or a demonstration.

TrailRider® is expandable with bolt-on sections. This 10'4" configuration produced 1900 lineal feet of 10 foot finished width five inches deep. The crew was able to reach 150 cubic yards per day even though trucks had to back up the 1900 foot driveway one at a time.
